Duos & trios

Pairs and threes ranked by lift. Above 1.00 means players choose them together more often than their separate popularity explains; below 1.00 means less often. Drawn from **500** teams.

the mark is 1.00 – even chance

Lift compares how often a combination appears against how often it would appear if people picked independently. Above 1.00 means players are putting them together on purpose — it is **not** a claim that the combination is strong. Combinations seen fewer than 5 times are left out, because a ratio built on a handful of picks moves on chance alone. **Only 17 of 112 trios clear 1.00**, against 38 of 161 duos: a team has four slots, so three popular characters crowd each other more than independence predicts.
